

IRAN STEEL FAB

**THE 3rd INTERNATIONAL EXHIBITION OF
STEEL STRUCTURES AND INDUSTRIES, MACHINERY
AND RELATED ENGINEERING SERVICES OF IRAN
20-23 NOVEMBER 2025**

Permanent location of international exhibitions of the Islamic Republic of Iran

Product groups allowed at the exhibition

Manufacturers of various types of industrial and construction steel structures - Manufacturers of bolts and nuts, overhead and construction cranes, elevators, multi-storey car parks - Manufacturers of welding, cutting, bending and drilling machinery and tools and equipment - Manufacturers of paints, resins and industrial coatings, welding wire, electrodes, stone plates and other welding items - Trading companies, engineering and consulting companies and knowledge-based companies in the field of metal structures - Inspection companies, quality control and specialized laboratories for materials and verification of the construction and welding process

About the exhibition organizer

IRAN STEEL FAB (ISF)

(CAMSI)

Steel Structures Cooperative Company of Iran

The Cooperative for Meeting the Needs of the Members of the Steel Structure Manufacturers Association was formed in 2018 with about 20 members, and its overall goal has been to synergize existing capacities, reduce production costs, and create and expand the culture of using standard steel structures. The steel structure manufacturing industry is one of the most important industries, and the level of development of each country depends on progress in this field. As the industrial revolution has been defined by the role of steel and its application. This industry has played an effective role in all parent industries such as the oil and petrochemical industry, the electricity industry, the transportation industry, and the railway network of the construction industry, and practically progress and development without considering the steel structure manufacturing industry would be meaningless. By pursuing and expanding the culture of using standard steel structures, with the support and cooperation of the National Center for the Certification of Standards of Iran and the General Directorate of Standards of Tehran, Camsi Cooperative has been able to introduce authorized units in the field of building standard steel structures, and provide a basis for mutual cooperation with the Engineering System Organization of Tehran Province and the Tehran Municipality. The output of this is the Circulars No. 10, 11, and 12 of the Engineering System Organization in the field of steel structures, which emphasize and force the notification and use of standard steel structures to the design, supervision, and execution engineers. Also, by issuing a circular to 22 regions, Tehran Municipality has forced the need to use standard steel structures in receiving the completion of the work, and with these measures, the engineering community of the country has practically encouraged it to prevent the waste of financial and human capital of its compatriots by improving the quality of the building and by eliminating non-specialists in this industry, it keeps it safe from serious damage

IRAN STEEL FAB

THE 3rd INTERNATIONAL EXHIBITION OF
STEEL STRUCTURES AND INDUSTRIES, MACHINERY
AND RELATED ENGINEERING SERVICES OF IRAN

20 - 23 NOVEMBER 2025

Permanent location of international exhibitions of the Islamic Republic of Iran

Objectives of holding a specialized exhibition

IRAN STEEL FAB (ISF)

- Helping to develop the country's exports and earn foreign exchange
- Attracting domestic and foreign investment
- Exchange of knowledge and new technologies in construction engineering and design
- Introducing manufacturers of standard steel structures
- Display of exported products
- Introducing specialized and general visitors to new technologies
- Researchers' access to scientific research
- Strengthening political-economic relations with exhibition diplomacy
- Strengthening the business environment of participants
- B2G.B2C.B2B Holding meetings and conferences
- Customer surveys on the quality of products and services
- Holding specialized conferences and educational workshops
- Assessing market capacity and developing domestic and foreign markets
- Creating opportunities for new and knowledge-based businesses
- Meeting with managers and officials of public and private companies

IRAN STEEL FAB

THE 3rd INTERNATIONAL EXHIBITION OF
STEEL STRUCTURES AND INDUSTRIES, MACHINERY
AND RELATED ENGINEERING SERVICES OF IRAN

20 - 23 NOVEMBER 2025

Permanent location of international exhibitions of the Islamic Republic of Iran

Product group classification:

IRAN STEEL FAB (ISF)

Steel products

- Manufacturers of various types of industrial and construction steel structures (frame structures, shell structures, suspended structures, truss structures, etc.)

Supply Chain, Distribution and Manufacturing Engineering

- Manufacturers of bolts and nuts, overhead and construction cranes, elevators, multi-storey car parks
- Manufacturers of welding, cutting, bending and drilling machinery and tools and equipment
- Manufacturers of paints, resins and industrial coatings, welding wire, electrodes, stone plates and other welding items
- Trading companies, engineering and consulting companies and knowledge-based companies in the field of metal structures
- Inspection companies, quality control and specialized laboratories for materials and verification of the construction and welding process
